WORK EXPERIENCE

Fullstack Software Engineer
December 2023 - October 2024
JakinCode S.L.

- Developed and maintained web applications using Python/Django and JavaScript (Vue.js/React.js).
- Designed and optimized REST APIs with Django Rest Framework.
- Led meetings with clients to discuss maintenance and new feature implementation.
- Mentored and guided intern programmers during their training period.
- Managed task queues and caching using Celery and Redis.
- Implemented Docker and Docker Compose for efficient deployment.
- Ensured code quality through unit testing (TDD).
- Worked with Agile methodologies (Scrum, Kanban) using Asana.

Fullstack Software Engineer
February 2022 - June 2023
Revoluz Energy Consulting, S.L.

- Developed full-stack web applications using Python/Django and JavaScript (Vue.js/React.js).
- Built interactive maps using Leaflet.js and OpenStreetMap.
- Deployed applications in the cloud using DigitalOcean VPS.
- Implemented version control using Git and GitHub.
- Designed and optimized databases in MySQL.
- Managed projects and tasks using Jira.

EDUCATION & CERTIFICATIONS

Bachelor's degree in Computer Engineering (Software Engineering Specialization)
September 2018 - June 2023
University of Alicante.

Course: Django and Django rest framework from basic to professional.
January 2023
Udemy.

- Mastered Django fundamentals, web application deployment, and DevOps basics.

Course: Django for Everybody (University of Michigan).
July 2024
Coursera.

- Focused on best practices, structured development, and performance optimization.

ADDITIONAL INFORMATION & TECHNICAL SKILLS

Languages: Spanish (Native), English (Professional Proficiency).

Interests: Scalable web applications, API development & security, Performance optimization.

Soft Skills: Problem-solving, Teamwork & Communication, Adaptability.

Languages & Frameworks: Python (Django, Django Rest Framework), JavaScript (Vue.js, React.js), HTML5, CSS3.

Databases: PostgreSQL, MySQL.

Cloud & DevOps: Docker, DigitalOcean, VPS Configuration.

Tools & Version Control: Git, GitHub, GitLab, Jira, Asana.

Other Skills: REST API Development, Performance Optimization, TDD, Agile (Scrum, Kanban).
